THINK TEETH!

Oral Health Is Important During Pregnancy and Early Childhood

Keeping your teeth and gums healthy during pregnancy protects your baby’s teeth, according to the American Dental Association. Plus, paying attention to good oral health during pregnancy helps maintain overall health. So, be sure to brush and floss daily! Good oral health shouldn’t stop once your baby is born. In fact, tooth decay is caused by bacteria, and babies can “catch” the bacteria from their parent. So keep your mouth healthy, and take your baby to the dentist by their first birthday. Then schedule regular dental check-ups as recommended by your child’s doctor or dentist.

Medicaid and the Children’s Health insurance Program (CHIP) cover children’s dental services, such as teeth cleanings, check-ups, x-rays, fluoride, dental sealants and fillings. Some states cover dental services during pregnancy , too. A family of 4 with income up to \$60,000* may qualify for free or low-cost health insurance through Medicaid or CHIP. To learn more or to enroll, call 1-877-KIDS-NOW (543-7669) or visit [InsureKidsNow.gov](https://insurekidsnow.gov). **[OR STATE/LOCAL CONTACT INFORMATION]**
